

SMRT Battery Upgrade

Replacement of lead acid batteries with lithium-ion batteries

Advantages

- + Operating time measuring system typically 15 hours
- + Much longer running time even at low temperatures
- + Shorter battery charging time (typically 3 hours), previously 10 hours
- + Charger integrated in measuring case+ External charger not applicable
- + Charge status display with LED+ Lighter weight:
 - Measuring case - 3.3 kg (lighter battery)
 - Accessory case -1.2 kg (charger is no longer necessary)
- + Air transport possible without extra declaration: power less than 100Wh
