

intuitive Bedienoberfläche

Setting up and operating the new XDK851 is intuitive and can be done by scale manufacturers and end users without a manual. Compared to the DK850, this is a whole new world and, compared to the competition, simply easier!

The user interface also offers many other advantages:

- Bright daylight readable display
- Touch / soft buttons
- Multi-language capability
- Enabling of individual masks or areas possible (PIN protection)
- Visible set-up status
 - Delivery status
 - Configured
 - Adjusted / ready for use
- Service contact with QR code also for manufacturers of scales can be set up

Some screenshots give you a first impression of the self-explanatory user interface:
